EDUCATION

University at Buffalo   **2023-2027**
- BS Computer Science

High School   **2019-2023**
- Staten Island Technical High School

WORK EXPERIENCE

Summer Design Institute   **June 2023 - August 2023**
SWE Intern for Staten Island Tech   Staten Island, NY
- Developed a robust backend for a club attendance app using Express.js, integrating Google APIs such as Google Sheets and Google Drive.
- Effectively pinpointed and resolved complex issues in a schedule builder app, to ensure a smooth and user-friendly application experience.

                                                                                              June 2022 - August 2022
- Developed automated internal systems to handle new and existing network devices
- Assisted students and school staff in rectifying technical issues throughout building
- Developed Kiosk software to help connect DOE ipads and aid hundreds of teachers and students in connecting to the wifi
- Investigated and resolved hardware and software issues in the wifi system

Tech Incubator at Queens College   **February 2022 - April 2022**
Intern   New York, NY
- Developed a wordpress website for current and former interns to find freelance jobs
- Collaborated with clients to build their business websites
- Upgraded and modernized previous web apps

Grant Associates   **January 2022 - February 2022**
Intern   Brooklyn, NY
- Actively participated in 20 hours of workshopping to better understand my industry field,
- the journey, and next steps after high school

PROJECTS

TechAnime | Github Code | (Nuxt, Django, SQL, GraphQL, Google OAuth)   **2022-2023**
- Developed a platform dedicated to hosting anime awards voting and presenting data visualizations tailored to SITHS students, fostering a hub for students to both participate in awards selection and make informed viewing choices

USO! | Github Code | (Nuxt, Mongodb, Express, Auth0, Pixi.js, Howler.js)   **2021-2022**
- Inspired by osu! mania and guitar hero. USO! Is a web based game with a visually-appealing and user-friendly platform that provides an immersive competitive experience for the end user

Taste of China Brooklyn | Github Code | (Assessable HTML and CSS)
- Developed and designed a website for my family's Chinese restaurant
